NEW CONSTRUCTION

You'll find a 100 Series window or door to match any project from commercial to residential — no matter the location.

And with uniform sight lines, it's easy to specify 100 Series products for the entire project.

- 3 1/4" [79] uniform sight lines allow for easy specification.
- An extension jamb attachment flange is available for easy application of extension jambs on the job site.
- Single-hung drywall pass-through windows have an upper sash that can be easily removed on the job site after the window is installed. With both sash removed drywall can easily fit through upper floor windows.

FRAME TYPES: 1 3/4" Flange Setback or 1" Flange Setback With Stucco Key

For new construction, both frames have an integral installation flange that makes installation into a new opening easy and helps make sure the windows and doors are weathertight. For stucco exteriors, choose the frame with the stucco key to eliminate gaps that can result from the natural contraction of exterior stucco.

1 3/4" [35] Flange Setback

1" [25] Flange Setback

Casement Window Details - New Construction

Scale 1 1/2" (38) = 1'-0" (305) - 1/8"

CASEMENT & AWNING WINDOWS

Casement windows are hinged on the side and open outward to the left or right, while awning windows are hinged at the top and open outward. Both are also available as non-operating stationary windows.

100 SERIES CASEMENT WINDOW

100 SERIES

Low-maintenance and energy-efficient.

100 Series casement windows are not only low-maintenance and energy-efficient, they're also available in dark colors both inside and out. Made with revolutionary Fibrex® composite material, this budget-friendly window is the smart alternative to vinyl.

EXTERIOR & INTERIOR COLORS

100 Series windows and patio doors come in five exterior colors, including dark bronze and black — colors that are darker and richer than those of most vinyl windows. The interiors feature a premium matte finish for an attractive appearance.
