## **Memorandum**

### **0 North Mountain Drive: Tax ID 3.10-1-3**

#### **Context Limit Area**

---

At the February 2, 2023 Planning Board meeting, a Memorandum prepared by the Village's consulting planner, dated January 28, 2023, was discussed. In that Memorandum, the Village's consulting planner suggests that, if the "net lot area" - the total lot area less the deduction for a percentage of steep slopes over 15% - is used for the Building Coverage and the Impervious Coverage, variances or waivers would be needed for the proposed house.

A Memorandum prepared by Gotham Design Planning & Development Ltd. has been prepared and submitted to the Planning Board and its consultants providing the history on steep slopes ordinances in Dobbs Ferry and contending that the correct limits on Building Coverage and Impervious Coverage should be based on the total or "gross" lot area. Using the total lot area for the calculations of Building Coverage and Impervious Coverage, the proposed project is compliant.

This discussion led to a question about the proposed size of the house. In earlier meetings with the Planning Board, the size of the house and the way in which the house fit into the context of the neighborhood were both discussed. A review of the videos of the Planning Board meetings reveals a number of times when members of the Planning Board indicated that, while the house is large, it is consistent with the context of the neighborhood. The plan of the proposed house has not changed since those meetings. Regardless, there were several comments by Planning Board members at the February 2, 2023 meeting that there were now concerns with the size of the house.

The subject parcel has an area of 23,337 square feet and is located in the OF-2 zoning district, which requires a minimum lot area of 20,000 square feet. While the subject parcel was approved in October 1989, after the Steep Slopes Ordinance was adopted and added to the Dobbs Ferry Village Code, and while the minutes of the Planning Board meeting at which the approval was granted includes confirmation by the Chair of the Planning Board that the lot was created as a building lot compliant with all zoning requirements, the Building Department has denied the application for the development of this parcel as a building lot due to the fact that the computation of steep slopes requires a deduction of 7,621 square feet from the gross lot area of 23,337 square feet, resulting in a net lot area of 15,716 square feet, which the Building Department has deemed now requires a variance due to insufficient lot area.

An application has been filed and presented at a Public Hearing conducted by the Zoning Board of Appeals (ZBA). The ZBA has referred the matter to the Planning Board and requested that the Planning Board render a decision on the Site Plan application that has been submitted to the Village prior to the matter returning to the ZBA.

## Context Limit Area

When a property is being compared with its “context,” the Dobbs Ferry Zoning Ordinance has defined the Context Limit Area as follows:

### CONTEXT LIMIT AREA

All lots contiguous to a subject property as well as all buildings fronting on the same street as the subject property within 200 feet of the subject property. [Added 6-14-2011 by L.L. No. 6-2011]

The Planning Board has requested that the proposed house be compared to the others in its Context Limit Area to confirm that it is not out of scale. The Table below includes all of the properties within the Context Limit Area, but also includes all of the properties that could be considered the immediate neighbors to the Subject Parcel. For example, 40 Osceola Avenue is the next house to the north and is located on the corner of Osceola and North Mountain Drive, but is not included in the Context Limit Area, since it fronts on Osceola.

The method used has been to assess the lot area and the building coverage for each of the properties for comparison with the Subject Parcel. The source for this data is the Town of Greenburgh GIS and Property Cards, which are available on the Town of Greenburgh's website.

Address	Lot <sup>1</sup> Area	Living <sup>2</sup> Area	Building <sup>3</sup> Coverage	Slope <sup>4</sup>
8 Osceola Avenue	40,075	5,396	3,893 9.7%	9.1%
40 Osceola Avenue	38,333	5,659	3,302 8.6%	9.5%
2 North Mountain	40,511	4,990	2,394 5.9%	16.2%
62 North Mountain	20,038	4,113	2,958 14.8%	26.9%
65 North Mountain	16,988	2,833	1,992 11.7%	25.9%
72 North Mountain	22,651	3,015	2,604 11.5%	17.1%
74 North Mountain	20,473	4,156	3,651 17.8%	8.9%
77 North Mountain	35,284	7,051	4,200 11.9%	25.9%
79 North Mountain	80,150	5,050	3,442 4.3%	24.3%
88 North Mountain	65,340	5,292	4,484 6.9%	11.3%
93 North Mountain	36,590	4,124	4,306 11.8%	27.2%
Average <sup>5</sup>	54,603	4,698	3,421 10.5%	18.4%
<b>Subject Parcel <sup>6</sup></b>	<b>23,337</b>	<b>4,958</b>	<b>3,724 16.0%</b>	<b>26.4%</b>
3.10-1-2	50,094			21.1%
3.50-13-1	32,234			37.2%
3.60-19-1	29,185			25.9%

Memorandum for 0 North Mountain Drive

Context Limit Area

February 14, 2023

Page 3 of 5.

Footnotes:

1. The Lot Area is in square feet and is as listed on the Town of Greenburgh Property Card.
2. The Living Area is in square feet and is as listed on the Town of Greenburgh Property Card.
3. The Building Coverage is in square feet and has been calculated for each property using the diagrams and listed areas included on the Town of Greenburgh Property Card. Terraces and pools were not included.
4. The Slope for each parcel was calculated using the GIS 2 foot contours on the Town of Greenburgh Map. The slope was calculated by taking the length of a property line running perpendicular to the contours and then subtracting the elevation at the low corner from the elevation at the high corner. The Delta between the two elevation points was then divided by the length of the property line, producing the result listed.
5. The Average numbers have been tabulated by adding the numbers for the properties above and then dividing by the eleven entries.
6. The numbers listed for the Subject Property for Lot Area and Slope were provided using the same source as the other properties included. The Living Area and the Building Coverage were similarly calculated using the same methods that generated the numbers included on the Town of Greenburgh Property Cards. The pool and the terraces were not included in these numbers.

### **Observations**

The house proposed for this property is a relatively large home. This is the result of the Client's program and personal preferences. Their intent is to build a house that will be in keeping with the other relatively grand homes in this neighborhood. In many of the Dobbs Ferry neighborhoods, the proposed house would be considered out of scale with its neighbors, but this neighborhood has its own character and that is the context that has been used for the design of this house.

While there are many homes in Dobbs Ferry that are larger than the proposed, in some neighborhoods this proposed house would be the largest in the neighborhood, but this is not that neighborhood. The neighborhood within which this property is located is a neighborhood of larger homes. As much as building the proposed house in a neighborhood of smaller homes would be considered questionable due to its being perceived as "out of scale" with its neighbors, the same could be said here, if the house proposed was closer to the size of the Dobbs Ferry average new home. The proposed house is in scale with the context and other homes in this neighborhood.

Memorandum for 0 North Mountain Drive  
Context Limit Area  
February 14, 2023  
Page 4 of 5.

Dobbs Ferry's methods for determining whether a building is in scale with its neighborhood includes determining the Building Coverage, which is expressed as a percentage of the footprint of the building divided by the lot area. The proposed house is just under the maximum Building Coverage using the total lot area for the calculation. The Village's consulting planner has indicated that the Building Coverage should be calculated using the "net lot area," which is determined by subtracting a percentage of the sloped areas of the site that exceed 15% from the total lot area. We contend that the Code does not require the use of the "net lot area" and that the total lot area should be used for this determination. That issue has been addressed in other documents that have been submitted to the Village for review in support of this application.

There are 11 developed properties in what has been used as the Context Limit Area for this Memorandum. In addition to the contiguous properties to the Subject Parcel and the other properties facing on the same street within 200 feet of the Subject Parcel, other properties that are within the area have been included.

While not included in these calculations, we have also provided the base information on the three undeveloped lots that were previously created by subdivision from the neighboring properties. Parcel 3.50-13-1 is the immediate neighbor of the Subject Parcel to the south. This parcel, together with parcel 3.60-19-1, was created by subdivision from 77 North Mountain Drive. The Subject Parcel was created by subdivision from 79 North Mountain Drive.

The houses at 77 North Mountain Drive, 79 North Mountain Drive, and 88 North Mountain Drive larger than the proposed house, but also on larger properties. While this makes a difference in terms of the math, the reality is the proposed house will sit in a context that will be very similar to these properties, even if homes are built on the undeveloped parcels that adjoin the Subject Parcel.

The two homes across the street from the Subject Parcel at 62 North Mountain Drive and 65 North Mountain Drive are smaller than the proposed, but are also on smaller properties, more significantly affected by the steep slopes than the Subject Parcel due to how shallow the parcels are from the street to the back property line.

The proposed house has been designed to sit into a complex context of slopes. It is recognized that there will substantial site work required for this house to nestle into the topography. We are confident that the design will work well on this complicated site. More important, the proposed house will fit the context of the other homes in this specific neighborhood.

This property is in the "Juhring" neighborhood, as identified in the Dobbs Ferry Vision Plan, adopted by the Village in 2010. The "Features" of the Juhring neighborhood identified in the Vision Plan include the following:

- Large lots with large handsome houses, backing on to the Juhring Estate, Ardsley Country Club, and its golf course.
- Rolling terrain rising to hilltops that feature parks and country club facilities.

The only concern for this neighborhood identified in the Vision Plan is the following:

- Some local residents have been resistant to through-traffic going to the Juhring Estate, effectively cutting it off from the rest of the community.

In many of the other neighborhoods evaluated in the Vision Plan, concerns included overly large homes that could be built in the context of smaller, older homes, changing the character of those neighborhoods. We have heard comments that some Country Club members suggesting a concern that construction on this site could change the character of their neighborhood. The house that has been designed has the scale, value, and character that will be consistent with the context of the Country Club.

### **Summary**

The proposed house is consistent with the character, scale, and value of the other homes in this neighborhood. While the lot size of the Subject Parcel could be considered on the low side compared with its neighbors, four of the eleven parcels included in this analysis are actually smaller. With 23,337 square feet of lot area, the Subject Parcel is on the large size in the Village of Dobbs Ferry. While the proposed house is large, six of the eleven homes included in this analysis are larger than the proposed. The context and character of the neighborhood reduces concerns over the direct proportion of the house to the lot area, since there is so much space around the homes and the fact that this is not going to change, even if the other parcels in the neighborhood are eventually developed with comparable large homes.

The topography of the Subject Parcel and the placement of the house on the site will not affect the views, sunlight, or other character of the neighboring properties. A robust landscaping plan is proposed and this will help maintain privacy between the homes, while making the neighborhood more attractive.

In the initial meetings with the Building Department, the Zoning Board of Appeals, and the Planning Board, the concerns identified as pertinent for this application focused on stormwater management, site stability, the necessary removal of rock ledge, and vehicular safety given the narrow, hilly road. All of these concerns have been addressed and the comments received from the Village's consulting engineer suggest that the Civil Engineer working for the Client has done a good job proposing the systems, requirements for construction, and improvements that will protect the health, safety, and welfare of both the neighbors and the Village.

We contend that, with all potential adverse impacts addressed and appropriate mitigating measures required, there is no reason that the proposed house should not be approved, allowing the property owner to have the house that they would like on the property purchased for this purpose.
