Village of Dobbs Ferry

RE: 111 Bellair Drive  
Request for Tree Removal

Copper Beech 55" DBH  
Location: South/West

Per my visual ground inspection on February 10<sup>th</sup>.

ROOT FLARE- No visible defects observed.

SOIL PROFILE- Approximately 6ft around this tree, organic material was previously installed to amend soil profile to help enhance root zone and reduce compaction.

MAIN TRUNK- No visible defects observed.

CROWN- Full balanced crown, small dead branches observed 2-3" in diameter. Minimal crossing and rubbing scaffold limbs under 10" in diameter, typical of this species growth habit.

In my professional opinion this tree appears vigorous and in good condition per my visual ground inspection of this mature tree.

Thank you for allowing Almstead to care for this beautiful tree.

If you should have any questions, please feel free to contact me at (914)741-1510 ext. #13.

Best Regards,

A handwritten signature in black ink that reads "Patrick McVey". The signature is fluid and cursive, with the first name "Patrick" and last name "McVey" clearly legible.
